DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This farmhouse and outkitchen are located on the east side of Maugansville Road about one half mile south of Maugansville in Washington County, Maryland. The buildings are located on an area of level ground near the road and face southeast.

The house is a two story, three bay structure of brick veneer, probably over log construction, resting on low fieldstone foundations. Flat arches of brick are present above the windows.

Windows have narrow rounded frames which hold two over two pane sashes at the first story level and six over six light sashes at the second floor. Hinge pins in the window frames indicate that shutters were present at one time. A modern projecting bay window has been installed in the southwest end wall.

The main entrance is located in the center bay of the front elevation, toward the east corner of that wall. Included in the door framing is a transom. The entrance is sheltered by a porch with a low hipped roof supported by turned posts.

The roof is covered with sheet metal and terminates with beaded barge boards set directly against the end walls. The eaves are finished with boxing under which runs a course of quarter round molding. A small brick chimney with corbeling at its top is located inside the southwest end wall and a metal stove flue extends from the northeast end wall.

Just southeast of the house is a one and a half story, two bay log outbuilding displaying "V" notched corner joining. A section at the north corner of the building appears to be of brick and frame construction. Much of the sheet metal roof is missing, revealing an earlier wood shingle covering. A brick flue with corbels at its top rises from the interior of the building near its northeast end wall.

The buildings are in fair condition and stand on a tract containing 1.37 acres.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This house, probably of log construction cased with brick veneer and its nearby log out-kitchen provide an example of an important type of Washington County's folk architecture. Log was a prominent building material in 18th and 19th century Washington County. Many of these log structures remain in use today covered with various forms of sheathing or bricks.
